Summary

I am a dedicated Data Engineer with a focus on building scalable data solutions using Python and SQL, complemented by extensive experience in cloud platforms such as AWS and Azure. My professional journey includes optimizing data migration workflows and developing interactive applications, along with a strong commitment to enhancing team performance and delivering impactful engineering solutions

Experience

Capgemini India Pvt. Ltd

Pune, Maharashtra

Software Engineer

11/2024

Consulting and technology services company

- Develop and optimize Python automation scripts to streamline enterprise data migration workflows, reducing manual effort significantly
- Design and execute system validation and testing frameworks to ensure data integrity and reliability across migration pipelines
- Deploy and configure AWS infrastructure (EC2, S3) for scalable, production-grade data processing environments
- Implement Git/GitHub version-controlled solutions with thorough documentation following engineering best practices
- Bridge development and cloud operations by collaborating cross-functionally to deliver robust data engineering deliverables

N3Clouds Technologies Pvt. Ltd

Kolkata, West Bengal

MERN Stack Developer Intern

01/2024 - 06/2024

Tech company offering cloud solutions

- Maintained and enhanced the company's admin dashboard, ensuring functionality, performance, and efficiency
- Designed the frontend structure using ReactJS and Material-UI; integrated GraphQL APIs for dynamic data management
- Built and consumed REST APIs contributing to backend data flow and application architecture

Salesforce (Virtual)

Virtual

Salesforce Developer Intern

05/2023 - 07/2023

CRM service provider

- Developed and customized Salesforce workflows, solutions, and data integrations for CRM applications
- Contributed to data quality testing, issue resolution, and user support for enterprise Salesforce environments

Education

Manipal University Jaipur

Jaipur, Rajasthan

Bachelors in Electronics and Communication Engineering

08/2020 - 05/2024

Skills

Gmail • Python • SQL • AWS • Azure • GitHub • AWS Cloud • EC2 • S3 • React • GraphQL • REST • Dataflow • Salesforce • CRM • AWS S3 • Modular • Tailwind • JavaScript • C/C++ • HTML • CSS • AWS Lambda • CloudFormation • Elastic Beanstalk • ETL • SpringBatch • MongoDB • NoSQL • Git • Docker • Node.js • Express.js • Linux • Ubuntu • Kali • GCP • IEEE

Projects

GitHub SaaS Migration Automation

Pune, Maharashtra

11/2024

Automation project for GitHub repositories migration

- Built Python-based automation scripts for repository migration, validation, and reporting across enterprise GitHub environments
- Integrated AWS S3 for artifact storage and EC2 for compute, ensuring reliable end-to-end pipeline execution

Projects

Admin Dashboard

Kolkata, West Bengal

01/2024 - 05/2024

Admin dashboard project for data management

- Developed a React.js admin dashboard with GraphQL API integration for dynamic data management and real-time analytics visualization
- Ensured scalability with modular design, responsive routing, and Material-UI component library

Social Media Application

Pune, Maharashtra

05/2024

Social media application development project

- Building a full-stack social media app using React JS, Appwrite (BaaS), Tailwind CSS, and React Query
- Implemented backend services including authentication, database management, and cloud file storage with Appwrite
